

Celebrations USA

Looking for a way to share your photos or videos?

We help make your memories last forever.

The personal touch

We are a DVD authoring business specializing in the personal touch. We take your photos and videos and put them on Dvd or on the web to share with friends and family. We do one project at a time with the utmost care with your media.

Most of our referrals are by word of mouth from satisfied customers. Most of our projects feature graduations, anniversaries, birthdays, funeral memorials, holiday gifts, etc..

Every picture is scanned manually. Touchups include scratches and dust, color correction, red-eye, etc..

Every video clip is watched, not just a robotic transfer.

So why are our prices lower?
Less overhead and advertising costs.
As former educators immersed in technology, we have the expertise and a passion for what we do with the satisfaction of making someone's life more enjoyable.

The professional touch

We include your photos on a CD, as an archive, so you can use them again for another project, print them, or have them for a book. We recommend that the DVD video be backed up to tape.

DVD standards are changing. We want to be ready for that transition.

Taking the Time

We spend time with you, our clients, organizing, planning, and reviewing your project. We get it done quickly, usually in a week or so. You won't be calling us wondering where and what happened to your photos and video.

"These guys are good."

"Exceeded my wildest expectations."

"It seemed like my son and I were watching a Hollywood premiere."

"I thought I could do this myself, but realized it would take all of my time.

There would be too much to learn."

"The audio was greatly improved from the VHS tapes."

We are members of NAPP,
The National Association of
Photoshop Professionals.

We use numerous
programs to capture and
edit your video.
